

playfit® at the Mecklenburg-Vorpommern regional games
organised by Special Olympics® Germany

After playfit® participated in the Special Olympics World Games in 2023 with an inclusive exercise island, we were also present at the Special Olympics regional games in Mecklenburg-Vorpommern this year.

Unfortunately, the weather threw a spanner in the works for everyone involved, but the organisers were able to quickly relocate most of the competitions to the athletics hall right next door: the fun continued and playfit® was "right in the middle" of the action with its mobile exhibition models.

You can see some impressions here:

playfit® at the Mecklenburg-Vorpommern regional games
organised by Special Olympics® Germany

Apart from interesting technical discussions with decision-makers from various institutions, the most pleasing aspect was that visitors approached the equipment with a specific purpose in mind and clearly enjoyed doing the fitness exercises.

All in all, it was a great experience for the playfit® team on site too!
